Reasons for Allowance

The following is an examiner's statement of reasons for allowance: no prior art has been found that either teaches or fairly suggests the production of a conjugated diene rubber composition comprising (A) 5% to 95% by weight of a conjugated diene rubber having a weight average molecular weight in the range of 1,000 to 3,000,000 wherein at least three conjugated diene polymer chains in said rubber are bonded together through at least one polyorganosiloxane selected from those which are represented by the general formulae (1), (2) and (3), shown in the claims, and (B) 95% to 5% by weight of a conjugated diene rubber having a weight average molecular weight in the range of 1,000 to 3,000,000 which is a reaction product of an active conjugated diene polymer chain having an active metal at a terminal thereof with a compound selected from those recited. The objection to the Specification is hereby expressly withdrawn. The rejection of claims 1-11, 17 and 18 as failing to comply with the enablement requirement is expressly withdrawn in view of the amendment. The rejection of claims 1-11, 17 and 18 as failing to comply with the written description requirement is expressly withdrawn in view of the amendment. The rejection of claims 1-11, 17 and 18 as failing to point out and distinctly claim the subject matter which applicant regards as the invention is expressly withdrawn in view of the amendment.

The rejection of claims 1-11, 17 and 18 under 35 USC 103(a) as being unpatentable over Sasagawa et al (US 6,767,969) taken in combination with Watanabe et al (US 4,657,965) is deemed untenable in view of the amendment and applicants' remarks thereto.

Art Unit: 1796

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
